

High Effort IT Specialist

CHRONOLOGICAL EXPERIENCE

Lead Developer – Enclave AB 2025–2026

Building a sovereign cloud stack in Kubernetes on Proxmox
Complete responsibility of infrastructure design and choices

Penetration Tester Student – ITHS 2024–2026

Vulnwaning in AD environments, penetration testing of web applications, API consumption with scripting; secure configurations of servers, workstations and OSes
Security assessment, Netsec and attack path mapping reporting

Customers Service Agent – Mekonomen Group 2024

Intern due to hiring stop and I just wanted to feel I had a job

Technical Repair Shop Assistant – Alina Service 2024

Trial work week in role selection process. Did memtest, refurbish of hardware, software reinstallations/updates/fixes + cashier work

Search Engine Result Analyst – OneForma 2023

Analysing data bulks from Google and Bing engines and ranking results based on relevance and locality of the queries

Javascript Algorithms and Data Structures – freeCodeCamp 2022

Online course corresponding to 300 study hours

RELEVANT SKILLS

Programming Languages – C, C++

Written small helper bins in C, a text-based terminal game with keyboard events, and payloads for WinAPI

Developed a Raytracer in C++ with a friend
Learning game engine development in the OGRE

Scripting Languages – Python, JavaScript, Bash

Built a toolbox of good-use Python scripts to scan network, MiTM ops, handle client-server file transactions, + different types of API consumers, scrapers and simple Flasks with login guard

Bash scripting for system maintenance – Systemd services configs, watchdogs to OOM guard buggy servers, one-click backup locator and restore scripts, custom changes to application runtimes for separate workspaces and sessions, data sorters and file edits.

Frameworks – AI Agentics, NodeJS + React

Used AI Agentics to configure and setup AI agents for the product of Enclave
Implemented a hard-lock system with password protection to guard sensitive files and information, session management and handling of subagent tasks and runtime.
Did security research on default settings of the framework and found prompt injection via simple text files.
Doing further research on PDF embeddings to test Agentics + RAG systems on this.

Made a typical E-commerce Web portal with a product gallery, checkout cart and admin login for account management in NodeJS + React. Also played with three.js lib to render animations and made a fun book that opens with camera zoom on content.

Markup Languages – HTML5, CSS, YAML, TeX, XML

Read most of it fluently and TeX is just a new hobby to learn about different file formats and embeddings of such

Human Languages – Swedish, English
